

Tips For Creating A Successful Business...

Did you know that you can speak things into existence in your life? Did you know that whatever is against you can be removed with your very tongue. **It's TRUE!** All you have to have is faith in yourself! **There are NO LIMITS in life... except the limits you put on YOURSELF!!** Something to think about huh?

Starting a business is something **VERY** exciting... (and scary too)! A business definitely becomes a part of you... a part of who you are inside. It sure has for me!!! When you start a business... you start realizing your dreams... and then you begin to really appreciate your business and you become anxious for others appreciate it too.

I find that alot of people get discouraged and just give up without truly reaching for the stars...(or bubbles in the picture). Everyone has dreams... and the best present you can give yourself.... is to take time to discover

your talents and follow your dreams!

I have been established in business for **SEVERAL** years now! I went from just a few hits a month to thousands of hits a month, so if I can do it... so can you! A lot of people who open a business expect it to take off immediately... but it doesn't work like that. It just doesn't! It takes time, work, money, nurturing, and **A LOT** of patience! Websites don't usually take off for at least 2 years after it's started. There is no get rich quick scheme when it comes to business! If you are starting a business out of desperation needing money you are starting it for the wrong reason. A business is like a child... it needs attention, nurturing, and you must be able to re-invest back into your business for it to succeed. As a successful business owner... I have seen several WAHM businesses close their doors because of impatience, frustration, the economy, and feelings of defeat. Please don't allow these feelings to defeat your dream! Patience is the most important thing to remember.

Promoting your website is a lot of work but it is **CRUCIAL** to the success of your business! You can have the most beautiful design and most amazing products; however, if you don't promote your website... your business will go **NOWHERE** fast! Networking is a **VERY** important part of owning a business! You need to spend time promoting your website by networking (**participating in banner/link exchanges**, joining networking groups, getting a newsletter going for your business, promoting your website on the social media outlets... like facebook, twitter, blogging)!

You will also need to make sure your **SEO keywords** are right on your website pages, you'll need to see your business as a baby that needs nurturing... (after all... you wouldn't expect your newborn to run would you?), re-invest your money back into your business, **ALWAYS** carry business cards with you so that if you talk about your business you can pass them out, and be patient!

People also want to buy from professional looking websites with clear pictures, people they

know they can count on, people they know stand behind their products. Quality products and affordable prices are also **VERY** important.

Getting a business off the ground is **A LOT OF WORK**... but it is able to be accomplished and success can happen to anyone!! If you do all of these things... you can accomplish what I have done too!! It's all worth the time spent networking because it **DOES** work! I know..... because I am proof of the success you can reach through promotion of my website!

Thanks so much for viewing this post... I wish you all great success!
